MOBILE WORKSHOP

The purpose of these mobile workshops is treatment and repair of tank equipment, armoured transporters and vehicles.

The mobile workshops are equipped with necessary equipment, tools, fixtures, measuring instruments and spare parts.

The TERRAIN CHAMBER TRUCK, T-815 4x4 with the typical fully sealed boxvan ZSK/PT is the basis of this mobile workshop.

The mobile workshops have their own source of 220V/380V power.

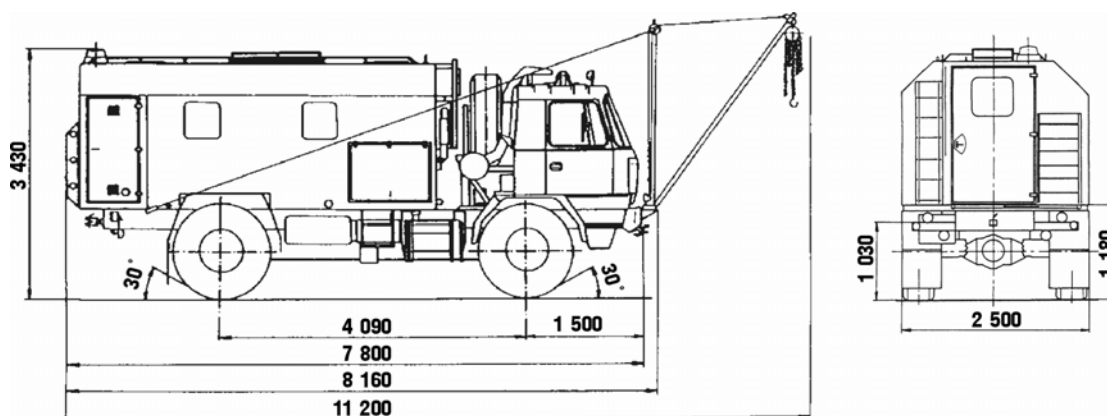

The treatment and repair of electric equipment and special outfits are state of the art for mobile workshops.

The mobile workshops are specially equiped in the following versions:

- 1. MOBILE FITTER WORKSHOP PDZ-2T/55**
for maintenance and local field repairs of T-55 tanks and armoured transporters (BVP)
- 2. MOBILE FITTER WORKSHOP PDZ-2T/72**
for maintenance and local field repairs of T-72 tanks and armoured transporters (BVP)
- 3. MOBILE WORKSHOP PD-2ES/T**
for testing, calibration and repairing the electrical systems of tank mechanisms, of the T-72, T-55, T-54, armoured transporters BVP-1, BVP-2 and their undercarriage variants.
- 4. MOBILE WORKSHOP PD-2ES/A**
for testing, calibration and repairing the electrical systems of the vehicle systems (including wheeled armoured transporters), T-813, T-815 4x4, T-148, UAZ-469, ZIL-131, BRDM.

Technical Data

Weight of superstructure (max.)	6 500 kg
Total weight (max.)	15 000 kg
Vehicle engine output	170 kW
Maximum allowed speed	85 km/hod

Mobile workshops can be delivered in the basic variant, or in combination with other sets of tank mechanisms or electrical equipment combat vehicles.
